Goodbye, HyperTerminal!

Tiger Optics' Serani™ Interface Software offers users a new way to access their analyzer remotely from any computer or laptop. The Windows-based software package communicates with the analyzer through RS-232 or Ethernet and allows full control of the system from your desk. Additional features allow data collection on your computer, advanced graphing and data analysis capabilities, as well as shortcuts to important service functions.

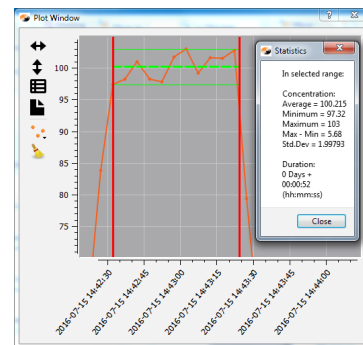

Serani features in detail:

- Monitoring and control of your Tiger analyzer remotely with dedicated application software installed on your computer or laptop
- Data plotting and analysis in real-time with the click of a button
- Continuous logging of concentration data
- Easy change of analyzer settings, such as gas type and data filter
- One-step data collection for "Remote Certification" and other service function short-cuts
- Compatible with Windows XP, 7, 8 and 10
- Compatible with any HALO, Spark, Tiger-i, CO-rekt and ALOHA H₂O series analyzer (full list see reverse)
- Analyzer firmware version 5.0.0 or higher recommended for full functionality (details see table on reverse)
